DETAILED ACTION

Response to Amendment

Examiner acknowledges response by applicant's representative received 8/15/06. Examiner further acknowledges the cancellation of claims 1-4 and the addition of claims 5-15.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Solomon (521).

Solomon discloses a Psychotherapeutic Device.

Art Unit: 3711

Regarding claims 5-6

Solomon teaches a three dimensional teaching aid that is a model for works of writing (figure 1), assigning structure to the writing (puppets) and using them to assemble and interpret thoughts regarding the article (see abstract and claims 1-16).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Solomon (521).

Regarding claims 7-9 & 13-15

Solomon teaches soft tactile material being used and further teaches color form construction (see col. 3, lines 3-10). Solomon however fails to teach the use of parts of a hamburger, pillows or foam as part of his representation. It would have been an obvious matter of design choice to uses whatever shape or form as desired or expedient. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results.

Art Unit: 3711

Regarding claims 10-12

Solomon teaches a three dimensional teaching aid that is a model for works of writing (figure 1), assigning structure to the writing (puppets) and using them to assemble/rearrange and interpret thoughts regarding the article (see abstract and claims 1-16). Inherent in the teaching of Solomon is expression via writing of the story on the teaching aid.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
